## A19 LED BULB-UL

9W

Truelite LED bulbs require less wattage than less efficient incandescent bulbs, reducing CO2 emissions and delivering energy savings of up to 80 percent. In addition, the Truelite range of bulbs lasts from 15 to 25 times longer than incandescent counterparts, depending on the range chosen. This extended life span, up to 25,000 hours for all models, significantly reduces labor and replacement costs. Truelite LED bulbs deliver superior-quality light that enhances product appearance and the working environment. LED bulbs are more cost-effective than their incandescent or CFL counterparts, and specialty LEDs have become widely available for the different lighting applications in modern homes.

### Features

- High efficiency, long life and high reliability.
- High CRI.
- 100% full load burn-in test.
- Emits virtually no UV/IR light in the beam.
- High operating temperature range
- Compact in size.
- Easy installation.
- Suitable for indoor application.
- E26 base models.
- Luxury out looking and enhanced heat sink construction.
- No glare design.
- Using constant current driving circuit with power factor correction.
- CE, Energy star, RoHS, FCC certifications.
- Dimmable type.
- UL listed.

## Electrical Parameters

Input Voltage	120 VAC
Frequency	60Hz
Driver Power Efficiency	>80%
Total Power Consumption	9W
Power Factor(PF)	>0.96
Color Rendering Index	80
Color Temperature	2700/3000/4000//6000K
Base	E26
Beam angle	120°
Center Beam Candlepower (CBCP)	91.04
Working Ambient Temperature	-20°C To + 50°C
Initial Lumens	620lm
Service Life	>25000 Hours
Light Fixture Material	Aluminum Shell, Milky diffuser
Color	Silver
Dimming	Yes
Dimension	Ø60*115mm

\*All parameters are measured @ ambient temperature Tc 25 degree

## Application Area

Widely used in indoor places like museums, hotel, restaurants, conference rooms, bar, office, showrooms, and home lighting. It is an ideal replacement for high energy consuming incandescent, CFL, halogen etc.
